

I don't understand why you would even waste the time and tax payers money to try to put down a very important service that XM Radio provides. If I were the radio stations I would be afraid to. The difference is that I wouldn't go crying to my mamma to have the government to change the rules. I would try to improve the quality of my own product and stop crying about the competition. Cable and sat tv have been fighting it out with commercials. They seem to manage. So let them duke it out with out the government changing things to give any one the uper hand. Thanks.....Scott
